MR. HULLAH'S MUSIC HALL, LONG ACRE.—A portion of the new St. Martin's Hall, erected from the design of Mr. W. Westmacott, for the use of Mr. Hullah's singing schools, is completed, and about to be opened. We will give some particulars next week. The approaches seem very unsatisfactory; but this, perhaps, results from the fact that the design is at present but partly carried out.

ARCHITECTURAL ASSOCIATION.—At a late meeting, Mr. Charles Gray read a sensible "Review of the Present Position of Architecture." On the 1st inst., a paper was read by Mr. J. D. Wyatt, on "The Steeples of Northamptonshire."

ATKINSON'S CEMENT.—This Cement has hitherto been manufactured in Yorkshire, and through long deception at sea, has often proved stale and unfit for use on its arrival in London. By the arrangement now made, the Cement will be manufactured in London, and thus proceeded to consumers in a fresh and genuine state, by the sole Agents, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENTS, for internal stucco, are employed very advantageously in place of wood for skirtings, architraves, and panel mouldings, and for in-door flooring instead of stone. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an important substitute for stone, wherever the purest and most permanent whiteness and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement that has the advantage over that material of wholly resisting frost. When used as a stucco it does not penetrate or turn green in damp weather, and persons are not annoyed by the Cement being absorbed by the bricks. Employed as an hydraulic mortar for brick-work, it mixes from two to five measures of sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement will bear one measure of sand. This superior cementing power, combined with its eminently hydraulic properties, point it out as the finest material for building sea and river-wall, cement walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water are required.
Manufacturers—J. B. WHITE and SONS, Millbank-street, Westminster, and 46, Seel-street, Liverpool.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, Son of the Patentee.—Messrs. ROBINS, ASPDIN, and Co. request reference to No. 298 page 49; and also Nos. 304 and 306, pages 343 and 361 of "The Builder," for accounts of EXPERIMENTS on the strength of Portland Cements, whereby the great superiority of their Cement is manifest. This Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the action of water; it is stronger in its cementitious qualities, harder, and more durable than any other description of Cement; it does not vegetate, shrivel, or form green; nor is it affected by any atmosphere whatever the climate, resisting alike the cold in Russia and heat in India. It is manufactured on as from fire to fifty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; also by their Agent at the Depôt, 1, Back-lorne, Liverpool.

MARTIN'S PATENT
FIRE-PROOF AND ORNAMENTAL CEMENT,
APPLICABLE FOR
ALL INTERNAL PURPOSES WHERE PLASTERING IS REQUIRED.

This invaluable Cement has never before the public so many years, and obtained such a standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. Messrs. ASPDIN and SON, however feel called upon to observe, that from the greater extent of surface which a given quantity of MARTIN'S will cover, as compared with other Cements for internal use, there will be found a ratio of 60 per cent. in material, full 7 per cent. less in price, with an additional saving in labour of 15 per cent., by its adhering to bricks without forming so much less than one tenth of the time of other cements of a similar nature, therefore worked with greater facility, making together the enormous saving of full THIRTY THREE PER CENT. its advantages therefore must be manifest to all desirous of economy.
Specimens, showing its beauty, hardness, and workability to all plain and ornamental purposes, may be seen; and the Cement in any quantity, obtained of Messrs. ASPDINS and SON, at their Plaster and Cement Works, 306, Drury-lane, London.—Manufactory, Derwent Mill, Leeds.

THE PARIAN CEMENT, for INTERNAL STUCCO, which was employed in Messrs. J. S. MORLEY'S warehouses and dwellings in Wood-street, Cheapside, to the City, has been used throughout the premises, in every story, altogether about ten thousand yards superficial, chiefly upon recently built walls, and a small portion upon timber partitions, and that with the most perfect and satisfactory result. I feel it also necessary to observe, that the plastering work was almost invariably followed up on the next day by the painters, therefore enabling me to have the premises completely ready in the shortest possible time, both for business and for the occupation of the establishment. I am therefore, of opinion, that the use of this new material is a most valuable feature in building operations and fully justifies that which I was drawn to in the first instance, viz., that it was an extra ordinary material. I think it right to mention that I am at the present time having a great extent of similar work executed at another range of buildings where time and the quality of the work are of the utmost importance.
Signed: JAS. WALLEN, Architect, London.
